

SUMMARY

Software Engineer building web and mobile applications, with solid experience in server-side development, APIs, and database design. I write clean, maintainable code, work comfortably in Linux environments, and apply data engineering and analysis skills to support informed technical decisions. Collaborative and detail-oriented, with hands-on experience in Agile/Scrum workflows.

STRENGTHS

- Strong problem-solving and analytical thinking
- Clear communication and effective teamwork
- Quick learner with a structured, detail-oriented approach
- Ability to translate requirements into maintainable code
- Self-motivated in collaborative academic projects

SKILLS

Languages

Python, JavaScript, TypeScript, PHP, Java, C++, Swift

Backend & APIs

Next.js, Node.js, Express, Django, FastAPI, Laravel, JEE, REST API, Webhook API, gRPC API, GraphQL API

Web & Mobile

HTML/CSS, Tailwind, Bootstrap, Angular, Vue, React, React Native

Data & Databases

SQL, NoSQL, Data Engineering, Data Analysis

DevOps & Tools

Git, Linux, GitHub (CI/CD), Agile/Scrum

INTERESTS

Coding for Social Impact

Passionate about using software to solve meaningful problems - from civic platforms to tools that improve everyday life for communities.

Tech Industry Evolution

Actively following emerging trends in AI, cloud computing, and modern development practices to stay current and grow as an engineer.

Gaming

Enthusiast of strategy and adventure games - a creative outlet that sharpens problem-solving, patience, and strategic thinking.

MOURTALLA TOURE

Software Engineer

Junior

EDUCATION

Bachelor's in Computer Science - Application Development (Web, Mobile & Gaming)

Université Numérique Cheikh Hamidou Kane (UNCHK)

Nov 2023 – Present

Data Engineering

FORCE-N

Feb 2026 – Present

Data Analysis Certificate

FORCE-N

Completed Oct 2024

Online courses - MOOCs & self-directed learning

PROJECTS

May 2026

jwebgen - Jakarta Servlet/JSP Scaffolding CLI

Node.js · Java · Jakarta Servlet · JSP · Maven · npm · Shell & Node Scripts

- Built and published a cross-platform CLI (npm) that scaffolds Jakarta Servlet/JSP WAR projects with a standard Maven layout
- Generated Node.js (.mjs) and Shell scripts to automate build, deploy (Tomcat/WildFly), live-reload dev, and environment setup
- Shipped with GitHub Actions CI on Linux, macOS, and Windows, plus semantic-release for automated npm publishing

View project

Oct 2025

CEC - Equal Opportunity Card Management Platform

Angular · Node.js · Express · MongoDB

- Designed and implemented REST APIs with Node.js/Express for card registration and admin workflows
- Modeled MongoDB schemas and built the server-side business logic
- Integrated an Angular front-end with interactive admin dashboards

View project

Jan 2025

GOTA - Telecom Operators & Subscribers Management

Python

- Built a Python application to manage telecom operators and subscribers
- Designed data models and CRUD operations for operator and subscriber records
- Implemented business logic for subscription and operator relationship management

View project

Jan 2025

User Settings Panel

HTML · CSS · Bootstrap

- Created a responsive profile management interface with HTML/CSS and Bootstrap
- Implemented forms for user preferences, profile updates, and security settings
- Applied component-based layout patterns for maintainable UI structure
